Section 1. Install Babel Package for Eclipse IDE

1.1.	How to install Babel package for Eclipse IDE1–1
1.2.	How to start Eclipse in English language on systems
	with Japanese Locale1–7
1.3.	How to start Eclipse in Japanese language on
	systems with English Locale1–9
1.4.	How to change the encoding technique in SciTE1-11

Section 1 Installing Babel Package for Eclipse IDE

Eclipse is a global community, and it is in everyone's interest to ensure that Eclipse is available and translated in as many locales as possible.

Babel is a set of tools to make the job of globalizing Eclipse projects easier. This document talks about the steps involved in installing the Babel package needed to adapt the Eclipse deliverables to properly run in multiple locales and to translate selected Eclipse projects into multiple different languages (for example, Japanese).

1.1. How to install Babel package for Eclipse IDE

Perform the following steps to install the Babel package for Eclipse IDE:

1. From the Help menu, select **Install New Software**.

The **Install** window opens.

2. Click **Available Software Sites** as shown in the following image.

0	Install	- 🗆 🗙
Available Software Select a site or enter the location of a site.		() ()
Work with: type or select a site	Find more software by working with the Available Softw	Add
type filter text		
Name ① ① There is no site selected.	Version	
Select All Deselect All		
Details		10
Show only the latest versions of available software	Hide items that are already installed	
Group items by category	What is <u>already installed</u> ?	
Show only software applicable to target environment		
Contact all update sites during install to find required software		
0	< Back Next > Einish	Cancel

The **Preferences** window opens.

3. Click **Add** in the **Preferences** window.

U		Preferences		_ 🗆 🗙

?	< Back Next > Finish	Cancel
	N Dack Mext > Finish	Cancer

- 8. Then, type **CDT** in the search field and select **Babel Language pack for** tools.cdt in Japanese and click **Next**.
- 9. Review the selected items in the next window and click **Next**.

10. Select I <u>accept the terms of the license agreement</u> and click Finish.

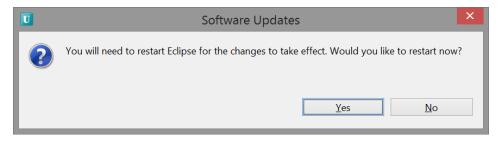

Eclipse downloads the Babel packages.

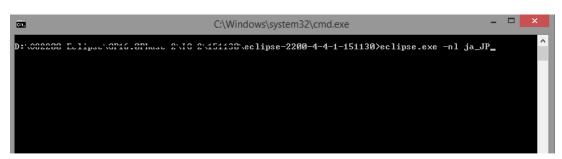

Note: Say OK to the following Security Warning message you get.

11. Eclipse will ask for a restart once the package updating is complete. Click **Yes** for Babel package to be updated completely.

12. If the operating system is running in Japanese Locale, then Eclipse will load in Japanese. If the operating system is not in Japanese, then run Eclipse from command prompt using "eclipse.exe -nl ja_JP" as shown in the following figure:

13. Eclipse will start with Japanese Locale.
